

## OPAL Lux Flushing Cistern

**Assembly shall be done in the following order:**

Put the drain valve (6) with the valve socket gasket (7) in the down of the tank (5). Screw the socket valve nut (8) on the valve socket. Enter the elbow (12) with fall pipe gasket (9). Screw on the external nut (10).

Install the fill valve (16) in the side hole of the tank (5). Turn the fill valve nut (15) to the fill valve. In order to determine the position of the tank fixation to the wall, use the carton's pattern.

It is not necessary to adjust a water level in the tank, but in case of such need, it can be done by adjusting screw of the fill valve floater (13).

Put the ending of the arm of the push button (1) through the overflow pipe hanger (3), and fix the cover (2) on the tank (5) by pressing in the clasps. Insert the hole plug (4) in the opposite side of the fill valve .
